DETAILED ACTION

1. Claims 1-43 are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, are drawn to a system and method for receiving packets on an input port, classifying packets in a classification engine, processing the packets in a processing system and queuing packets in a queuing engine, classified in **class 709, subclass 223**.
- II. Claims 31-43, are drawn to a method for classifying packets according to traffic types for placement in class queues, generating parent class for each class, allocating parent bandwidths to the parent classes, assigning a parent priorities to the parent classes, generating sub-parent classes for each parent class and providing a minimum bandwidth to the sub-parent classes, classified in **class 718, subclass 104**.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such receiving

packets on an input port, classifying packets in a classification engine, processing the packets in a processing system and queuing packets in a queuing engine, classified in a *different Class/ Subclass*. And invention II has separate utility such as a classifying packets according to traffic types for placement in class queues, generating parent class for each class, allocating parent bandwidths to the parent classes, assigning a parent priorities to the parent classes, generating sub-parent classes for each parent class and providing a minimum bandwidth to the sub-parent classes, classified in a *different Class/Subclass*. See MPEP § 806.05(d).

4. The inventions are distinct, each from the other because of the following reasons:

(a) These inventions have acquired a separate status in the art as shown by their different classifications.

(b) The search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the three inventions would not be co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group I search (claims 1-30) would require use of search **Class 709, subclass 223**.

The Group II search (claims 31-43) would require use of search **Class 718, subclass 104**.

Art Unit: 2157

For the reasons given above restriction for examination purposes as indicated is proper.

5. A telephone call was made to Applicants' Representative, Mr. Eric L. Prah (Reg. No. 32, 590) to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicants are advised that the response to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. A shortened statutory period for response to this action is set to **expire 1 (one) months and 0 (zero) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the applicant (see 35 U.S.C 133, M.P.E.P 710.02, 710.02 (b)).
